ORDER:-

In the reference read above, the Chief Engineer, Minor Irrigation, Hyderabad has stated that the Surappa Kunta is located in the heart of Hindupur town. It draws water from Peddacheruvu of Hindupur. But now the entire ayacut is developed as housing colonies in Hindupur town like Panduranga nagar, Ambedkar nagar etc. There is no ayacut under this tank. The self catchment of the tank was also closed because of the town developed in upstream. The tank is not filled for the last 10 years. The Land rates in Hindupur town are very high and unreachable to common man. This leads to the encroachment of the tank foreshore area. He has further stated that there is no permanent water source to Hindupur town. At present the Hindupur Municipality is supplying water once in 3 to 4 days through "N. Sree Ramireddy Water Scheme" by drawing 10 MLD from HNSS. During the review meetings conducted by the Hon'ble MLA Hindupur, the same was discussed and instructed the Superintending Engineer, IC, Anantapur to hand over the tank to Hindupur Municipality so as to convert it into summer storage tank and also instructed the Municipal Authorities to take over the Surappa Kunta and to submit the proposals for converting it into Summer Storage tank. The Chairperson, Hindupur Municipality has also requested to hand over the Surappa Kunta to Hindupur Municipality. The Chief Engineer, Minor Irrigation has therefore requested the Government to issue necessary orders for handing over the Surappa Kunta to the Hindupur Municipality.

2. Government after careful examination, hereby accord permission to the Chief Engineer, Minor Irrigation, Hyderabad, for handing over the Surrappa Kunta located in Hindupur town, Anantapur District to Hindupur Municipality, subject to condition that its shall be used only for the purpose of Summer Storage tank and the ownership rights shall remain with the Water Resources Department.

3. The Chief Engineer, Minor Irrigation, Hyderabad shall take necessary action accordingly.
